

Jory Sulemani

Junior Statistician | Medical Statistics & Clinical Research

Jeddah, Saudi Arabia | Open to relocation within Saudi Arabia
jory.sulimani25@gmail.com | Portfolio | LinkedIn

Statistics graduate with practical experience preparing and analyzing real clinical datasets in R. My work combines survival analysis, regression, research reporting, and on-site healthcare workflow documentation, with a growing focus on healthcare AI.

EXPERIENCE

Junior Statistician | Smart Business Systems (SBS)

August 2025 - Present

- Independently clean, validate, and prepare clinical data in R for statistical analysis.
- Apply survival analysis, regression, and hypothesis testing to healthcare research questions; contribute to interpretation, reports, and manuscript preparation.
- Conducted on-site observation of HLA laboratory workflows and authored a structured report documenting observations.

E-Learning & Distance Education Trainee | King Abdulaziz University

August 2025 - January 2026

- Independently developed and published Coffee Statistics, turning the Deanship's requirements into accessible statistics content and a live educational website.
- Prepared educational presentations, a poster, and a booklet for non-specialist audiences.

SELECTED WORK

ALP and survival | Collaborative graduation research

Study covering 3,223 patients across eight clinical cohorts. My contribution included data preparation and harmonization, Kaplan-Meier estimation, log-rank testing, Cox regression, and interpretation in R. Contributed to a research report, poster, and manuscript in preparation for submission.

HLA laboratory workflows | On-site observation and documentation

Conducted on-site observation of laboratory workflows and authored a structured observation report.

Time series | Academic project

Analyzed monthly sunspot observations (1749-2021), examining stationarity and differencing and comparing ARIMA models using AIC; selected ARIMA(2,1,2).

SKILLS & EDUCATION

Applied: R (strong working proficiency), data quality checks, clinical data preparation, survival analysis, regression, hypothesis testing, statistical interpretation and reporting.

Foundational: SQL queries and joins; basic Power BI exposure; Microsoft Excel.

Academic: Time series, classification, clustering, Random Forest, and Bayesian networks.

BSc Statistics | King Abdulaziz University | Graduated June 2026

CBP-PM: Certified Business Professional - Project Management. Exam passed; certificate awarded.
