

Jory Sulemani

Statistical Researcher · Medical Statistics, Biomedical Data & Healthcare AI

jory.sulimani25@gmail.com | Jeddah, Saudi Arabia | [linkedin.com/in/jory-sulimani-0981243a4](https://www.linkedin.com/in/jory-sulimani-0981243a4) | jorynabeel.github.io/Coffee-Statistics

I work at the intersection of statistical analysis, biomedical data, and healthcare research, with a growing focus on healthcare AI — with hands-on experience in survival analysis, regression modeling, and multi-cohort clinical data analysis in R.

FEATURED RESEARCH

ALP and survival: a multicohort statistical study — graduation research project

Statistical analysis of the association between serum alkaline phosphatase (ALP) and survival outcomes across 8 publicly available clinical cohorts (N = 3,223 patients), spanning cancer and hepatobiliary disease. Applied Kaplan–Meier estimation, log-rank testing, cohort-stratified Cox proportional hazards regression, sensitivity and threshold analysis, and cross-cohort heterogeneity assessment, in R and Python. Conducted with technical and research-environment support from Smart Business Systems (SBS) Innovations, supervised by Dr. Aisha Ghazwani. A manuscript describing this work is in preparation for peer-reviewed submission.

EXPERIENCE

Statistical Research Trainee — Smart Business Systems (SBS)

August 2025 – July 2026

- Conducted statistical analysis for medical, healthcare, and technology-related research projects using R
- Independently performed data cleaning, preparation, exploratory analysis, and statistical modeling
- Built and evaluated regression and survival models to investigate research questions
- Worked with healthcare and clinical datasets while maintaining appropriate confidentiality practices

E-Learning & Distance Education Trainee — Deanship of E-Learning and Distance Education, KAU

August 2025 – January 2026

- Independently developed and published an educational statistics website, “Coffee Statistics,” reaching approximately 150 visitors
- Managed the process end-to-end: interpreting requirements, building, and publishing the resource

SKILLS

Medical statistics

Survival analysis, Kaplan–Meier, log-rank tests, Cox regression, hypothesis testing, biomarker analysis

Clinical research

Clinical data analysis, multi-cohort analysis, research methodology, scientific writing

Programming & analytics

R (strong), Python (basic), SQL (basic), Excel, Power BI (basic)

AI & technology

AI-assisted technical problem-solving, structured prompting, GitHub

EDUCATION

BSc in Statistics

King Abdulaziz University, Jeddah — Graduated June 2026

Coursework: Data Mining, Big Data, Machine Learning, Time Series Analysis, Regression Analysis, Statistical Quality Control

CERTIFICATIONS

- Certified Business Professional – Project Management (CBP-PM), KAU
- Introduction to Modern Artificial Intelligence, Doroob (Oct 2025)
- Understanding Your Digital World with Power BI, Digital Giving Initiative (Sept 2025)
